Maths Learning Journey - This is the age related expectation for each of the year groups.

Learning journeys will be based on this but may be broken down further in classes.

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
<b>Measuring Space</b>	compare, describe and solve practical problems for: Length and Height	choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels	measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml)  measure the perimeter of simple 2-D shapes	convert between different units of measure [for example, kilometre to metre; hour to minute]  measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres  find the area of rectilinear shapes by counting squares	measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres  calculate and compare the area of rectangles (including squares), including using standard units, square centimetres (cm <sup>2</sup> ) and square metres (m <sup>2</sup> ), and estimate the area of irregular shapes	solve problems involving the calculation and conversion of units of measure, using decimal notation up to 3 decimal places where appropriate  use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to 3 decimal places
