

# Stories of friendship

Class 1 Term 6 2023

## Key Areas of Learning

As **Scientists**, we will be focusing on living things and their habitats, which will include creating microhabitats for minibeasts and considering what they need to help them survive. We will design and create our own bug hotels to help attract and care for minibeasts in our back garden area. We will also learn about different types of habitat and how they are suited to different animals needs.

As **Design Technologists**, we will be learning about where fruit and vegetables come from and how they grow. We will then use healthy eating principles to create a list of ingredients for a fruit salad and then create an algorithm/recipe for how to make it. We will then follow the algorithm we have created to make our fruit salad using knife skills and weighing skills.

As **Geographers**, we will be undertaking research to compare two different places, Kempford and Kenya. We will explore different human and physical features of both places to find out what similarities and differences there are between them. We will use geographical language to describe the places such as names of rivers and land features.

### ENGLISH

In our writing, we will be exploring adventure stories by writing a new adventure story including Winnie the Pooh.

Later in the term, we will do some writing challenges to help us practice the skills we have been learning this year.

For Guided Reading, we will be using the book hook to make predictions, inferences and answer questions from the text.

### MATHEMATICS

In Maths lessons, we will be focusing on the following areas:

Year 1 – Multiplication and Division

Measurement

Year 2 – Money

Length and mass

Each year group will also be practicing and revisiting skills previously learned this year.

### RE

In RE we will be exploring the question 'What makes some places sacred to believers?'

Our value that we will be exploring this term is Friendship.

### PSHE

We will be celebrating School Diversity week this term. We will also be learning about how humans grow and change, understanding differences between ourselves and others and challenging gender stereotypes. \*More information on content to follow\*

### PE

In PE, we will be continuing our focus of developing effective skills to play striking and fielding team games. We will also spend time practicing activities for Sports Day!

### COMPUTING

In Computing, we will be continuing our learning about creating animations using programming software.

### MUSIC

As musicians, we will be reflecting on different songs we have learned this year by listening to and appraising them, finding the pulse in the music and using instruments to compose a simple tune inspired by the songs we hear.

### MFL

N/A

### Learning skills

**As effective listeners and communicators we will:**

Show that we are aware of listeners when we are speaking by holding eye contact and adjusting what I say.

Carry out instructions with a number of steps  
show we can take turns when speaking in a group or the wider class

### Cultural Capital

**To develop our cultural awareness we will:**

Enjoy listening to and sharing different stories about friendship. We will consider how culture is different in our country and Kenya, thinking about how our daily lives might be different. We will also look closely at different religious buildings and take time to understand how believers worship in these places.

### Values and SMSC

**To develop our spiritual, moral, social and cultural awareness as pupils we will:**

Learn about the value of Friendship and model ways that we can be good friends to one another both inside and outside of the classroom. We will consider what other values we may show by being a good friend.

### Community

**As members of our school community we will:**

Contribute ideas to our school councillors for their school council meetings. We will also try our best to achieve House points and think about ways in which we can help our houses to achieve their goals.
